THEOLOGY AND SCIENCE IN GALILEO GALILEI'S LETTERE COPERNICANE

Video presentation by

Associate Prof. PhD. Ion CORDONEANU,

Faculty of History Philosophy and Theology, Dunărea de Jos University, Galați, Romania

He is a professor at the Faculty of History, Philosophy and Theology within the "Dunărea de Jos" University of Galați. He studied History - Philosophy at the University of Galați, the bachelor's thesis being about the philosophy of history at Mircea Eliade. He followed his doctoral studies at the "Alexandru Ioan Cuza" University of Iasi, with a thesis on the ontology of the logos in the period between the 1st - 4th centuries AD. He followed stages of postdoctoral research, having research fellowships in Paris and Rome.

He published *Creation and Incarnation. The Theory of the Logos from John the Theologian to Athanasius the Great*, Lumen Publishing House, Iași (2006); *The history of religions. Authors and guidelines in the study of the religious phenomenon*, Galați University Press Publishing House, "Dunărea de Jos" University of Galați (2011); *In dialogue. Studies in Christian philosophy, political theology and the history of religion*, Eikon Publishing House, Bucharest (2015); studies and articles in specialized journals indexed in international databases.

THE HUMAN MIND, LIMITS AND INFINITE PERSPECTIVES IN KNOWLEDGE

Associate Prof. PhD. Gina Luminița SCARLAT,
Dunărea de Jos University, Galati, Romania

Abstract

The human mind is the subject of research for various fields of activity. Socio-human research fields investigate the brain's relationship with the mind, its circumstantial and relational functionality, the biological support and the complex processes of the soul, the principles of its formation and the relationship with consciousness, as well as its mode of action at the level of the human communities. Besides these perspectives, there is a special domain of mind research: that of Christian patristic spirituality. But what are the research objectives of Christian spirituality with regard to the human mind? And why did the human mind come to the attention of the holy Fathers of the Church? From the texts of Christian anthropology and spirituality it follows that the mind has become a subject of research because the most intimate union between man and God is at its level.

ON THE BORDERLINE BETWEEN SOCIAL, EDUCATION AND KNOWLEDGE IN ROMANIAN INTERWAR SOCIETY

Associate Prof. PhD. Ovidiu Dănuț Soare,
Dunărea de Jos University, Galati, Romania

Abstract

During the Romanian interwar period, families who did not send their children to school were fined. In most cases, the fines were cancelled for various reasons such as the lack of communication, the families' low income or if the children returned to school as soon as possible. This process was a thorough one, involving several institutions, which means that education was taken seriously by the state institutions, such as the School, the Church and the Family. This article showcases aspects of education in rural areas in a rather tense period in Europe. An economically poor interwar rural environment, on the borderline between education and knowledge, aware of the importance of a good education, which was as important as caring for a medically healthy society or caring for a society well-prepared for foreign aggression.

Ideas Forum International Academic and Scientific Association

PHILOSOPHY OF INTERDISCIPLINARITY

Associate Prof. PhD. Curis Cecilia,
Dunărea de Jos University, Galați, Romania

Abstract

The interdisciplinary approach in science is becoming more widespread today. It is gratifying that in the age of applied sciences, in which technology prevails, philosophy as the core of the humanities is restored to its status. Starting from the definition of philosophy that includes notions such as knowledge, values, reason, existence, mind, language, it is not surprising the attitude of modern man in relation to the rational approach of including this fundamental discipline in scientific research in any field. This reconceptualization is absolutely necessary for the progress of humanity starting from the assumption that no field of scientific research can exist without a series of methodological principles. Consequently, we can consider philosophy, the theoretical foundation of any science and more than that, a science applied, per se with resonance in everyday existence. What can be more important for the human being than explaining the meaning of life, the relationship with peers and the psychological motivation of its existence in this world? Thus, philosophy can be the promoter of the active attitude of the individual in any social field. It is important to consider the model of the individual who from a moral point of view is interested, participatory, has a purpose and correctly defines his duties towards himself and society. These coordinates define the pattern of the human being capable of participating in the progress of humanity.

CLASSICISM AND NEO-CLASSICISMS IN THE HISTORY OF MUSIC

Associate Prof. PhD. Gabriel Bulancea,
University "Dunărea de Jos", Domnească Street no. 47, Galați, Romania,

Abstract

In one of his articles, Octavian Paler draws attention in a metaphorical-mythologizing manner upon one of the risks taken by those who chose tradition as their source of inspiration. The epigonic spirit, because this is what he refers to, cannot escape idolatrising tradition, phenomenon that happens within an alterity of the creative identity, within the pettiness of controlling the artistic means, within the infatuation of his own image which is placed under the protection of the great creative figures. The epigone masters in an embryonic form some techniques which, for various reasons, he cannot manipulate creatively. He is somehow suspended between two sensibilities, hence his failure. On the one hand, he is not aware of the risk of assuming past sensibilities, and on the other, he does not assume his contemporariness. Giving in to the temptation of looking too much into the past, the epigonic artist loses his identifying sensibility.

THE CONCEPT OF THE SOUL IN PLATO AND IN PATRISTIC THOUGHT

Marin Bugiulescu,

Prof. PhD. St. John Chrysostom Theological Seminary of Târgoviște, PhD. Student at
Doctoral School of Philosophy, University of Bucharest, Romania.

Abstract

The pre-existence and immortality of the soul is in fact the basis of Platonic philosophy. Plato presents the existence of the soul in the Phaidon Dialogue starting from the hypothesis that something called the soul has existence in the form of pre-existence and post-existence and has an intelligible nature, similar to the structure of Eidos (Ideas). The second part of the research considers the transition from ontology to metaphysics, focused on a different perspective given the patristic thinking in which man is created in his divine image, as a personal being composed of body and soul, a synthesis of the intelligible world with the material.

Associate Prof. PhD. Toma Florin,

Dunărea de Jos University, Galati, Romania

Abstract

This study aims to answer some questions related to the principles, rules, tools, and methods to be employed when working on a show to be performed in theatre schools, as opposed to performances in institutions. What are the requirements for such a goal? What comes first: pedagogical or artistic approaches? What are the criteria that should be used when choosing a dramatic text? Is there a clash between the objectives of a study program and the constraints of theatre performances or can they harmoniously complete each other? How can we draw the line between teaching and acting? What is a successful diploma theatre show? What is the relation between pedagogy and direction and how do they blend when putting a performance in place? What boundaries are to be crossed to make the transition from mere student to professional actor? These are only some of the questions that this study shall endeavour to answer, viewed especially from the perspective of the correlation between educational request and market demand, a lively subject of debate in contemporary society.

SCIENTIFIC LINGUISTICS, A NEVER-ENDING HISTORY

Presentation by

Associate Prof. PhD. Jacques COULARDEAU,
University Paris I, Panthéon-Sorbonne, Paris, France

He was educated at University Michel de Montaigne Bordeaux III, University of California at Davis California, and University Charles de Gaulle Lille III in general structural linguistics, phylogenic linguistics and Germanic linguistics. He was a visiting lecturer in UC Davis, U. Bordeaux III, U.Lille III, Buddhist Center at Pidurangala Sri Lanka, U. Perpignan at Mende, U. Paris II Panthéon Assas, U. Paris I Panthéon Sorbonne, U. Paris Dauphine, U. Versailles Saint Quentin en Yvelines at Mantes la Jolie, U. Paris VIII Vincennes Saint Denis. He holds two PhD in Germanic linguistics and in Didactics of Foreign Languages. His research has been essentially in linguistics, in English and American literature and arts, in drama, opera and cinema. In 2003 he entered the field of Buddhism and Pāli linguistics and went back to phytogenic linguistics with his present research on the Language of Cro-Magnon and the relations between the phylogeny of language, the migrations of Homo Sapiens out of Africa and the classification of languages. He is often working with younger assistants for various projects, among others Paula Osorio from Venezuela and Ivan Eve from Paris Sorbonne.

He has taken part and presented contributions in many international conferences in Europe and Northern America. He is vastly published in the USA, in Europe, in New Zealand and on the Internet as a researcher, a reviewer on the various Amazon sites, a research and literary author at Amazon Kindle Direct Publishing and as an independent researcher at www.academia.edu. His main blog is https://www.researchgate.net/profile/Jacques_Coulardeau. He has just finished his thirteenth and last annual contract with Synopsis-Paie in Nice.

PHILOSOPHICAL PATHOS IN MARÍA ZAMBRANO AND ARTHUR SCHOPENHAUER

Presentation by

Associate Prof. Dr. Encarnación Ruiz CALLEJÓN,
Faculty of Philosophy and Letters, University of Granada- Spain

Encarnación Ruiz Callejón graduated in 1994 in Philosophy and Letters from the University of Granada (Spain). During the years 1994-1996 she undertook doctorate courses at this university and in 1997 presented her Thesis "Art, truth and interpretation in Friedrich Nietzsche". She defended her doctoral thesis "Aristocratic morals or moral compassion. A metaphysical reflection on the problem of pain in Friedrich Nietzsche and Arthur Schopenhauer" at the University of Granada in 2002. She has expanded her training in philosophy with postgraduate studies, including, among others, on Islam and feminism. She completed her postdoctoral training at the universities of Trier (Germany) and at the Colli-Montinari Center in Pisa (Italy). Since 2019 she has been a Professor in the Department of Philosophy II of the University of Granada (Spain) where she teaches philosophy of religion, history of 19th century philosophy and Hispanic-Muslim philosophy. Her research continues in three complementary directions, based on the subject and the authors of her doctoral thesis and her postgraduate studies:

- 1) Analysis of specific aspects of the philosophies of Schopenhauer and Nietzsche.
- 2) Application of the contributions of concepts and approaches to both the problems and challenges of our time.
- 3) Analysis of the question of nihilism and the crisis of values in the context of the philosophy of religion in the three monotheistic cultures.

ENCODING REALITY INTO FICTION/DECODING FICTION AS REALITY. POSTMODERN HISTORIOGRAPHY AS CRITICAL THEORY

Presentation by

Senior Lecturer PhD. Oana-Celia GHEORGHIU,

Cross-border Faculty of "Dunarea de Jos" University of Galati, Romania

Oana-Celia Gheorghiu holds a PhD in English and American Literature and an M.A. in Translation and Interpreting Studies. She is a lecturer at the Cross-border Faculty of "Dunarea de Jos" University of Galati, where she teaches British Culture and Civilisation, Cultural Representations and Translation Theory and Practice. She is a literary translator, member of the Romanian Writers Union and the Romanian Association of Literary Translators (ARTLIT). She is the author of British and American Representations of 9/11. Literature, Politics and the Media (Palgrave Macmillan 2018) and From 19th-Century Femininity in Literature to 20th-Century Feminism on Film. Discourse Translation and Adaptation (Anchor Academic, 2015). A member of the editorial advisory board for the UK-based publisher Cambridge Scholars, she has recently edited and published two collective volumes: Shifting Twenty-First-Century Discourses, Borders and Identities (2020) and The Odyssey of Communism: Visual Narratives, Memory and Culture (2021, coedited with Michaela Praisler).

WHAT CAN EARTH HISTORY AND EVOLUTION TELL ABOUT THE CREATOR OF THE UNIVERSE?

Presentation by

Dr. Andreas MAY,
GERMANY

Dr. Andreas May was professor at the Saint Louis University - Madrid campus and authored numerous publications on geological and palaeontological topics. Now he works as a computer scientist in a large German company. He is a database expert and a scientist. Almost all of my publications are on palaeontology (Devonian corals, stromatoporoids, brachiopods and reefs) and geology (microfacies of limestone, weathering durability of building Stone, Devonian stratigraphy and extinction events).

From 1982 to 1991 Dr. Andreas May studied geology and palaeontology at the universities of Bochum and Münster in Germany. From 2002 to 2005 he was Professor for Earth Sciences, Environmental Sciences, Evolutionary Biology and Palaeontology at the Saint Louis University - Madrid campus. He wrote or contributed to more than 90 publications on palaeontology and/or geology. Now he is married, has four children and is working as a Senior Database Developer in Germany. Since 2017 he is writing a book on Christianity, evolution and related topics in German language as well as in Spanish language. Information about this project is posted in <https://www.researchgate.net/project/Christianity-and-Evolution> (in English), <https://www.facebook.com/may.devonian> (in Spanish) and <https://www.facebook.com/DAM-Wissenschaft-und-Glaube-106731404884228> (in German).

THE DUAL METAPHYSICS OF GOOD AND EVIL IN JEAN BAUDRILLARD'S SOCIAL AND POLITICAL ONTO-THEOLOGY: SINGULARITY VS. GLOBALIZATION OR RADICAL OTHERNESS VS. INTEGRAL REALITY

Presentation by

Professor Dr. Spiros MAKRIS,
University of Macedonia, Thessaloniki, Greece

Dr. Spiros Makris is Associate Professor of Political Theory at the University of Macedonia, Thessaloniki, Greece and Visiting Research Fellow-in-Residence at the Rothermere American Institute (RAI), Humanities Division, at the University of Oxford. Among others, he has been Fellow of Academy of Athens as well as Visiting Scholar at the Centre for Applied Philosophy, Politics and Ethics (CAPPE) at the University of Brighton. He has published more than thirty Monographs and lots of peer-reviewed articles and chapters in collective volumes. Some of his publications in English are the following ones: Hegemonism, American Foreign Policy and International Society (Établissements Emile Bruylant, S. A., 2010); Jacques Derrida and the Case of Cosmopolitanism (Rowman & Littlefield, 2015); Aristotle in Hannah Arendt's Republicanism (Annuaire International Des Droits De L' Homme, 2017); Democracy as a 'form of society'. Claude Lefort's post-foundational approach (European Sociological Association, 2017); Ethics and Strangers in the 21st Century. Fifteen critical reflections on Jacques Derrida's concept of hos(ti)pitality (Theoria & Praxis, 2017); Free Speech and Democracy in the 'post-Totalitarian era'. The neo-Aristotelian and neo-republican lesson from Hannah Arendt (Dia-noesis, 2020); Politics of Space, Strangeness and Culture in the Global Age (Routledge, 2021).

“THE GALILEO GALILEI’S THESIS EXPANDED”

Presentation by

Prof. Dr. WALTER GOMIDE NASCIMENTO JÚNIOR,

Department of Philosophy/UFMT- Brazil

EDUCATION: 1998: Graduation in Philosophy (Federal University of São João de Rei-UFSJ, Brazil).
2002-Master's degree in Philosophy (Pontifical Catholic University of Rio de Janeiro, PUC-Rio, Brazil).
2006: Phd in Philosophy (Pontifical Catholic University of Rio de Janeiro, PUC-Rio, Brazil. Advisor: Oswaldo Chateaubriand Filho).
2014: Post-Doctorate on Foundations of Mathematics (Federal University of Rio de Janeiro, UFRJ-HCTE, Brazil. Advisor: Ricardo Kubrusly; Co-Advisor: James Anderson, University of Reading, England).
TEACHING EXPERIENCE: 2008 to the present day: Federal University of Mato Grosso (UFMT).
Undergraduate Courses in Logic and Philosophy of Science.
Postgraduate courses Special Topics of Logic (from 2013 until 2019).
LANGUAGES: English; Italian, German and French.
My undergraduate and graduate studies were in philosophy. In addition, I maintain a strong interest in Mathematics and Physics. In these areas, set theory and its application to Theology has been a special focus. I have found that the framework of Cantor set theory is particularly amenable to theological applications.

EMANCIPATORY FUN IN EDUCATION FOR SUSTAINABILITY: WHY IS AN ENJOYABLE DIALOGUE BETWEEN SCIENCE, ARTS AND RELIGION RELEVANT FOR STUDENTS?

Presentation by

Prof. Dr. Alexandra OKADA,

Open University, UK

Dr. Alexandra Okada is an educational researcher at the Open University and a senior fellow of the Higher Education Academy. Her expertise lies at intersections between Science Technology and Education. Her studies draw on sociocultural theory, critical pedagogy and mixed methods to explore how to prepare the next generation for Responsible Research and Innovation to shape a sustainable world. “RRI” aims to align scientific development with societal needs through the interaction of five sectors: 1. educational communities, 2. scientific institutions, 3. business and industry, 4. civil society organisations and 5. policy makers. Her experience includes supporting these five sectors. Prior to joining OU, she worked as a 1. teacher in primary and secondary schools, 2. academic lecturer at the open university in Brazil and Portugal, 3. computer scientist at Johnson & Johnson and IBM, 4. senior consultant to the Association for Science Education UK and to 5. policy advisor the Secretary of Continuing Education, Literacy, Diversity and Inclusion of Brazilian Government. Alexandra holds a BSc Computer Science (Hons); MA (Education: Curriculum); Postgraduate qualification in Further Education (PGCFE), MBA (Knowledge Management and Science Communication); PhD (Education: Technology enhanced learning). Currently she is the scientific coordinator of the European funded project CONNECT – inclusive open schooling with future oriented science. She is also principal investigator of OLAF – Online Learning and Fun. <http://www.open.ac.uk/research/people/alpo3#tab3>.
